Introduction

Working smarter with ReAgile

Our integrated set of CRM systems, project management tools, knowledge base solutions and mobile applications enable your clients and employees to save time and be more productive.

More options, fewer limitations

We offer a suite of web-based productivity tools to help you maximize your workforce's productivity. You can choose from CRM systems to project management tools to knowledge base solutions and more. We don't limit you to one option when we know how much needs your business has for different services.

KibOs

A cutting-edge operating system for the funeral parlour industry.

Built for organisations of all sizes, KibOS increases operational efficiencies and delivers the confidence you would expect of a professional services organisation. KibOS automates various administrative tasks and lets you focus on what's most important: providing quality care and service to your customers.

Digital Self Service Platforms

Modernise your brand. Engage with your end members through mobile apps, online portals and an in-branch self-service terminal – thus reducing your cost to serve.

Member Policy Administration

Enjoy peace of mind. Our Intuitive member management platform supports records management, premium collection, document storage and more.

Burial Services Management

Delight your clients through complete management of the burial event, leveraging existing customer data, intelligent task management and robust compliance support.

Features

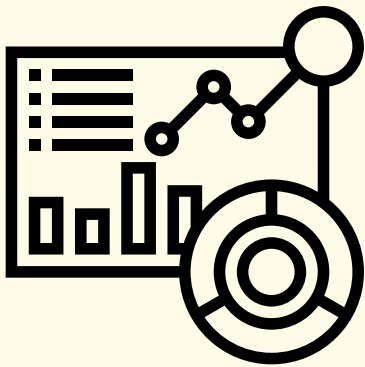

Policy management

CRM

Document management

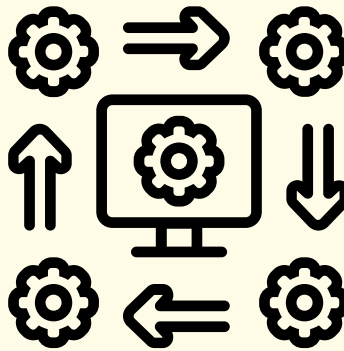

Funeral management

Stock management

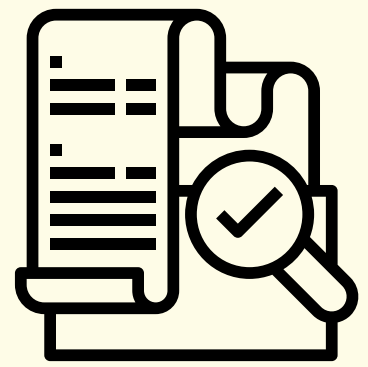

Dashboard

See a 'single source of truth' for all your client and enterprise data, so you can always find the information you need.

Workflow Management

Powerful workflow features let you create data flows and approval processes that speed up the pace of your business.

Workflow Management

Our experience of the regulatory environment means that the implementation of global and local requirements is efficient and painless.
